

Ethiopia: Displacement and Food Security

Since the beginning of this year Ethiopia has more new conflict-driven Internally Displaced Persons (IDPs) than any other country in the world, with over **1.4 million** in 2018. Of the approximately **2.8 million** total IDPs in Ethiopia, over **2.2 million** are displaced due to conflict with the over **500,000** remaining displaced by climatic shocks, including drought- and flood-induced food insecurity. An estimated **7.9 million** people in Ethiopia are in need of emergency food assistance, with those internally displaced being some of the most affected. Ethiopia is also home to over **900,000** refugees that require humanitarian assistance, and is the second largest host nation for refugees in Africa behind Uganda.

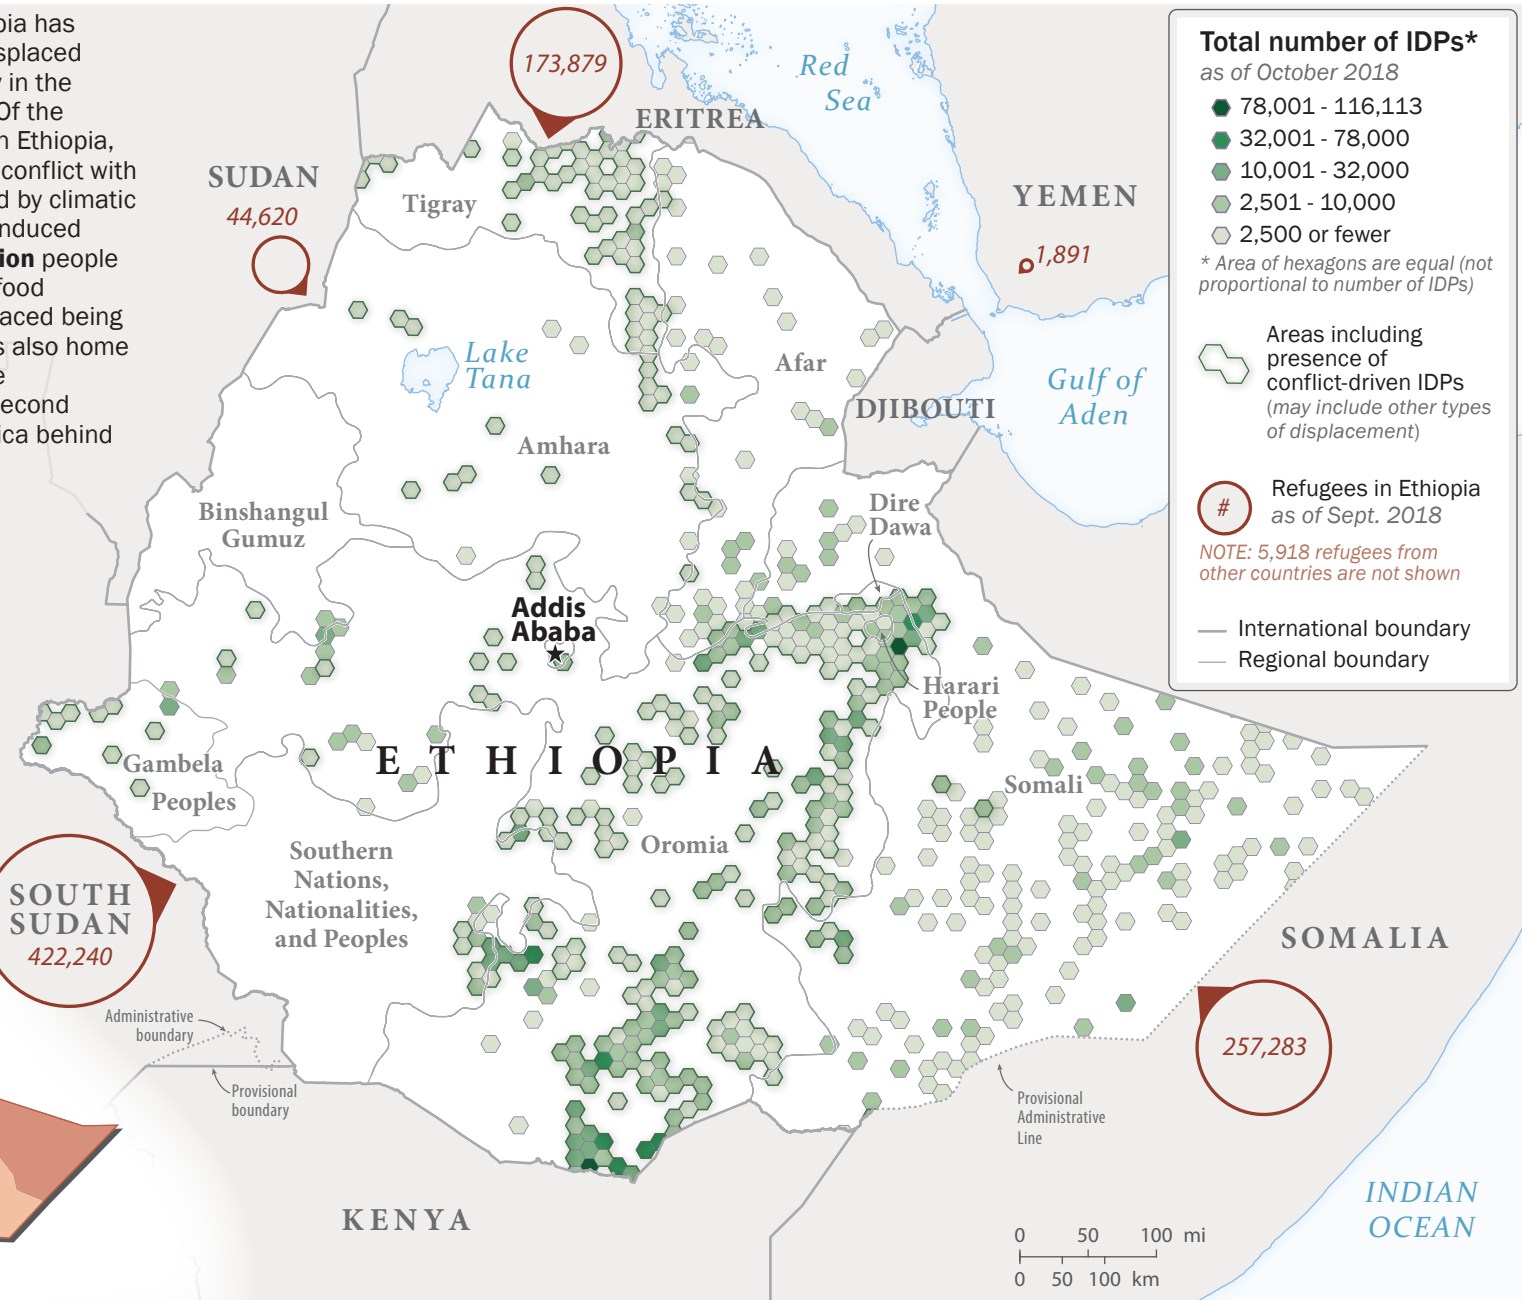

Integrated Food Security Phase Classification (IPC) in assessed areas

FEWS NET food security projections for October 2018-January 2019
